NUTRISCORE B

The word frizzante is commonly used to describe wines that are lightly sparkling or have a slight effervescence. On the other hand, pan cristal is known for its crispy texture and thin outer crust. The connection between the two lies in the idea of lightness and the particular texture they share. Just as frizzante wine has that delicate effervescence, pan cristal is characterized by its crispy crust and lightness compared to other types of bread. However, it is not simply its crispy texture that sets it apart. Just as a high-quality wine benefits from carefully cultivated grapes, pan cristal is made with high-quality flours and a slow fermentation process that allows the flavors to fully develop. Both pan cristal and a good wine are tributes to excellence in its purest form. Each offers a unique and unforgettable experience, reminding us that true quality lies in the details and the pleasure of enjoying life's little pleasures.
